

Texas Instruments Hangar McKinney Municipal Airport Fast Track

Texas Instruments decided to relocate its corporate aviation center to McKinney Airport just north of Dallas. McCASLIN ASSOCIATES was chosen to design this flagship hangar to exemplify Texas Instruments' presence as a Fortune 500 corporation as well as a leader in the global marketplace.

A unique requirement of this project was the need for an intense "Fast Track" schedule. McCASLIN ASSOCIATES was able to meet T.I.'s need to complete the design on time, greatly facilitating their relocation from a property with an expiring lease.
